**DETAILED ACTION**

1. This communication is in response to the amendment filed on May 1, 2003, claims 1 is pending. The rejections cited are as stated below:

***Response to Applicant's Amendment***

2. The Examiner acknowledges Applicant's amendment to the abstract, and therefore withdraws the previous office action's objection regarding this matter.

The Examiner acknowledges Applicant's arguments in the remarks with respect to the 102 art rejection, and therefore withdraws the previous office action's rejection regarding this matter.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 1 is rejected under 35 U.S.C. § 101 because, the claimed invention is directed to a non-statutory subject matter. Specifically the method claim as presented does not claim a technological basis in the pre-amble and the body of the claim. Without a claimed basis, the claim may be interpreted in an alternative as involving no more than a manipulation of an abstract idea

Art Unit: 3624

and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the body of the claim at least one structural / functional interrelationship which can only be computer implemented is considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) - used only for content and reasoning since not precedential].

In order to over come the 101 rejection above, the following preamble is suggested:

“A computer implemented method for ---”, or something similar. Also, in the body of the claim include at least one structural / functional interrelationship which can only be computer implemented.

### ***Conclusion***
